Scotland's National Patient Management System Provider.

NHS Scotland uses InterSystems' PMS to gain immediate access to better clinical and administration information from one standard healthcare information system – enabling improved diagnosis, patient care and safety, reduced costs, and enhanced reporting while reducing the amount of paper used.

Patients and care providers benefit from a better patient experience and improved outcomes from hospital to home. Learn more at [InterSystems.com/uk](http://InterSystems.com/uk)

### Unisys

[ga\('send', 'event', 'Image', 'Impression', 'Unisys', {'nonInteraction': 1}\);](#)

Unisys provides high-performance, security-centric solutions for some of the world's most demanding organisations. Our portfolio includes security software and services; digital transformation and workplace services, with many applications focused on the public sector's needs. Our Holmes solution has been a key element in enabling UK Police forces to solve ever more complex crimes for many decades, and our Stealth security portfolio enables secure information sharing within and across organisations. Stealth also enabled the University of East Anglia to quickly achieve PCI compliance by creating secure "communities of interest" (COIs) that rapidly reduces the cyber-attack surface and protects information transferred across its network from being accessed by unauthorised personnel outside of the COIs established by UEA administrators.
